

Grey Wolves

By Annie Whane

Grey Wolves

- Grey wolves are my favorite kinds of wolves. They live mostly around the N. W. T. Grey Wolves comes in a variety of colors.

Another name for the grey wolf is
“Timber wolves” and “Canis Lupus.”

I had seen wolves when I was younger and when I still lived at Prelude Lake.

The small pack of wolves came howling to our yard, so, me and my siblings ran towards the house for safety.

My mom scared them away for good. My family and I lived around thousands of trees, bushes and wildlife.
